

MARTIN SAGAT

Senior Software Engineer | Full-Stack, Mobile & Cloud Architect

+61 422 679 420 • martin.sagat@outlook.com.au • martinsagat.com • linkedin.com/in/martinsagat • github.com/martinsagat

Product-focused Senior Software Engineer with over 7 years of experience building scalable, high-availability web and mobile applications. Expert in TypeScript ecosystems, AWS Serverless architectures, and Cross-Platform Mobile (React Native). Proven track record of taking complex platforms from ideation to launch as a sole engineer. Specialist in FinTech integrations, security hardening, and performance optimisation.

TECHNICAL SKILLS

Frontend & Mobile	TypeScript, React 19, React Native (Expo), Next.js 16, Vue.js, Hono, MUI, TanStack Query, Redux Toolkit
Cloud & Infra	AWS (Lambda, DynamoDB, Cognito, CloudFront, EventBridge), SST, Serverless, Terraform, GCP, Azure
Databases	DynamoDB (Single-table, ElectroDB), PostgreSQL, MySQL, MongoDB, SQL Server
Tools & Platforms	Git, Docker, Turborepo, GitHub Actions, Vitest, Playwright, Stripe, Blackhawk, Rakuten, Twilio

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Sole Engineer) | PS Rewards

Jan 2026 – Present

- **End-to-end Ownership:** Designed, built, and operated a complete rewards ecosystem (3 web portals + mobile app) as the sole in-house engineer, scaling to 1,500 active users from launch.
- **Backend & Infrastructure:** Architected a serverless AWS stack with Hono on Lambda, DynamoDB single-table design (ElectroDB), and Cognito JWT auth; managed 4 SST environments.
- **Mobile App:** Shipped a cross-platform Expo / React Native app featuring FaceID biometrics, typed navigation, and automated EAS OTA release pipelines.
- **FinTech Integration:** Delivered secure gifting systems and unified cashback engines integrating Stripe, Blackhawk Network (mTLS), and Rakuten affiliate APIs.

Tech: TypeScript · Hono · AWS (Lambda/DynamoDB) · SST · Next.js 16 · React 19 · Expo · Stripe · Vitest

Senior Software Engineer | PCCW Global

Jun 2024 – Dec 2025

- **Type Safety Transformation:** Migrated legacy JavaScript applications to strictly typed TypeScript, significantly reducing production bugs and build-time errors.
- **Sales Automation:** Led delivery of the Capture Sync application, streamlining sales inquiry capture and syncing via Jira and HubSpot webhooks.
- **Engineering Standards:** Mentored the team on TypeScript best practices and implemented robust CI/CD pre-commit hooks.

Tech: TypeScript · Node.js · React · GCP · PostgreSQL · Camunda 8 · HubSpot API · CI/CD

Software Engineer | Valorem

Jan 2024 – Jun 2024

- Integrated EML Payments and Frankie One (KYC) into a serverless platform, enabling compliant and seamless payment processing.
- Contributed to DynamoDB single-table design schemas to optimise data access and system efficiency.

Tech: AWS · Serverless (SST) · TypeScript · Node.js · DynamoDB · EML Payments

Software Engineer | Autom8

Aug 2023 – Jan 2024

- I lead a transformation project from monolith to client and backend services.
- I mentor others to get them familiar with new technologies

Tech: Vue · .NET · Docker

Software Engineer | Big Picture Medical

Jan 2023 – Jul 2023

- I contributed to the SSO login features using access integration with the National Health Care System (NHS)
- I feature-engineered the activation mode for Medical Pathways at an organisational level, which helped Medical Practitioners configure the fitting Medical Pathways depending on their specialisations.
- I helped expand the custom Vue-based component library called MedKit UI. It's a library utilised across all BPM Products to ensure design consistency.

Tech: Vue · GraphQL · Laravel · NodeJS · AWS · PostgreSQL · Docker

Software Engineer | OneAffiniti

Aug 2021 – Jan 2023

- I developed an application for generating static websites from dynamic content designed by campaign managers. The application reduces computing power costs and increases content availability, making the content load faster.

Tech: Vue · Angular · Laravel · NodeJS · AWS · Terraform · Docker

Software Developer | Toll Group

Feb 2019 – Aug 2021

- **Incident Response:** Contributed to server restoration and critical security hardening following a high-profile 2020 ransomware attack.
- **System Stability:** Maintained a high-volume production tracking system, ensuring data flow from source devices into global databases.

Tech: .NET · C# · Azure · SQL · Windows Server · Angular · Laravel

EDUCATION & AWARDS

Bachelor of Information Technology, Computer Science — RMIT University, Melbourne

Diploma in IT, Business System Analysis — Australian Pacific College, Sydney

Employee of Q4 2021 — OneAffiniti (Recognised for outstanding technical performance)
